III. Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

1. The question whether the claimed invention appears to be novel, to involve an inventive step (to be non-obvious), or to be industrially applicable have not been examined in respect of:

- ☐ the entire international application,
☒ claims Nos. 4, 9, 17-50 and 55-60

because:

- ☐ the said international application, or the said claim Nos. _____ relate to the following subject matter which does not require international preliminary examination (*specify*):

- ☒ the description, claims or drawings (*indicate particular elements below*) or said claims Nos. 4,9,17-50 and 55-60 are so unclear that no meaningful opinion could be formed (*specify*):

These claims are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

- ☐ the claims, or said claims Nos. _____ are so inadequately supported by the description that no meaningful opinion could be formed.
☐ no international search report has been established for said claims Nos. _____.

2. A written opinion cannot be drawn due to the failure of the nucleotide and/or amino acid sequence listing to comply with the standard provided for in Annex C of the Administrative Instructions:

- ☐ the written form has not been furnished or does not comply with the standard.
☐ the computer readable form has not been furnished or does not comply with the standard.

V. Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**1. STATEMENT**

Novelty (N)	Claims <u>1-3, 5-8, 10-16 and 51-54</u>	YES
	Claims <u>NONE</u>	NO
Inventive Step (IS)	Claims <u>51-54</u>	YES
	Claims <u>1-3, 5-8, 10-16</u>	NO
Industrial Applicability (IA)	Claims <u>1-3, 5-8, 10-16 and 51-54</u>	YES
	Claims <u>NONE</u>	NO

2. CITATIONS AND EXPLANATIONS

Claims 1-3, 5-8 and 10-16 lack an inventive step under PCT Article 33(3) as being obvious over Cameron et al. {U.S. Pat. 2002/0065308}.

Applicants claim 5-oxo-pyrrolidine compounds. Cameron et al. teach 5-oxo-pyrrolidine compounds which are structurally similar to the instant claimed compounds. See in Cameron et al., for example, Formula I wherein X is CH₂, Z is phenyl, Q is carboxyl and R² is Ar (page 2, second column; and especially Example 2E on page 30). The difference between the compounds of the prior art and the compounds instantly claimed is that of homology (e.g., ethylene linkage attached to the 1-position of the pyrrolidine ring versus a propylene linkage in Cameron et al.). To those skilled in chemical art, one homologue is not such an advance over adjacent member of series as requires invention because chemists knowing properties of one member of series would in general know what to expect in adjacent members. The instant claimed compounds would have been obvious because one skilled in the art would have been motivated to prepare homologs of the compounds taught in the reference with the expectation of obtaining compounds which could be used in perfume compositions. Therefore, the instant claimed compounds would have been suggested to one skilled in the art.

Claims 51-54 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest the invention find in these claims.

Claims 1-3, 5-8; 10-16 and 51-54 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
